

About

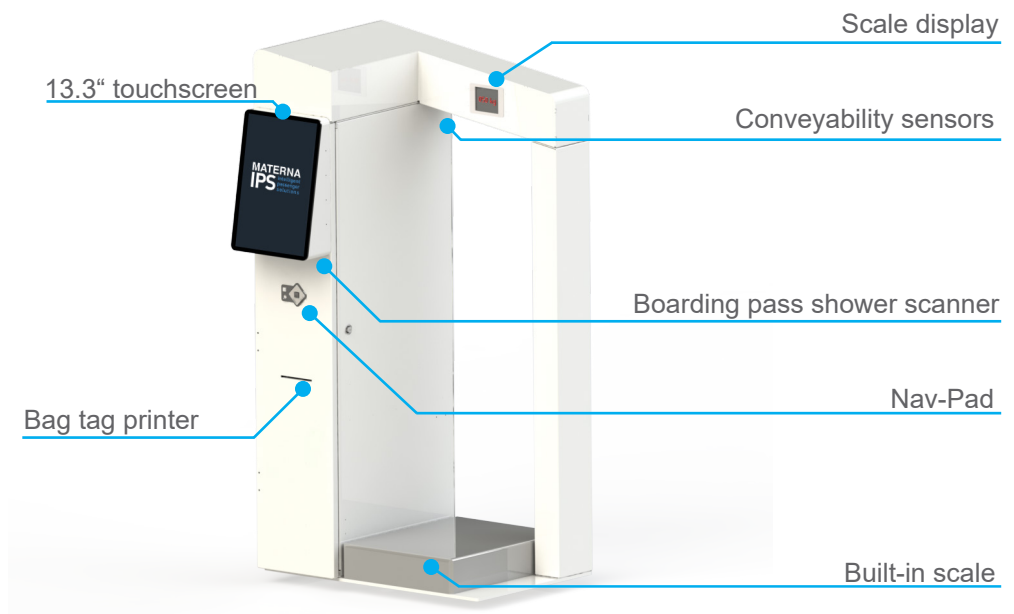

As a member of the Flex.Family, the Flex.Kiosk 4D shares the same design language and offers bag tagging functionality combined with a full conveyability check.

Based on our highly advanced Flex.Go SBD system, the Flex.Kiosk 4D uses the same high-resolution industrial cameras and innovative detection logic to provide advanced conveyability check features such as baggage volume measurement, classification and multiple bag detection. It is also equipped with a bag tag printer and an integrated scale. This allows

passengers to not only tag their bags, but also receive airline-specific information on whether their bag will fit in the carry-on compartment. Like all Flex.Family devices, Flex.Kiosk 4D features a fully customizable exterior (material, colors etc.) as well as interior (input devices, printers etc.).

Main features:

- IATA CUSS conform
- 2-step (1st step only)
- Intuitive user interface
- Bag tag printer
- Built-in bar code shower scanner
- ADA/PRMD compliant (optional)
- Biometrics (optional)

Your benefits:

- ✓ Advantages of 2-step bag drop process
- ✓ Provides airline's specs for carry-on baggage
- ✓ Adaptable to any airport environment
- ✓ Adapt to traffic & passenger requirements
- ✓ Reduced / low PAX processing time

Touchless.Connect:

- Kiosk control via passenger's smartphone
- Web browser based, no extra app needed
- Suitable for Android, IOS & other OS
- Remote installation
- No HW modifications or recertification needed
