

About

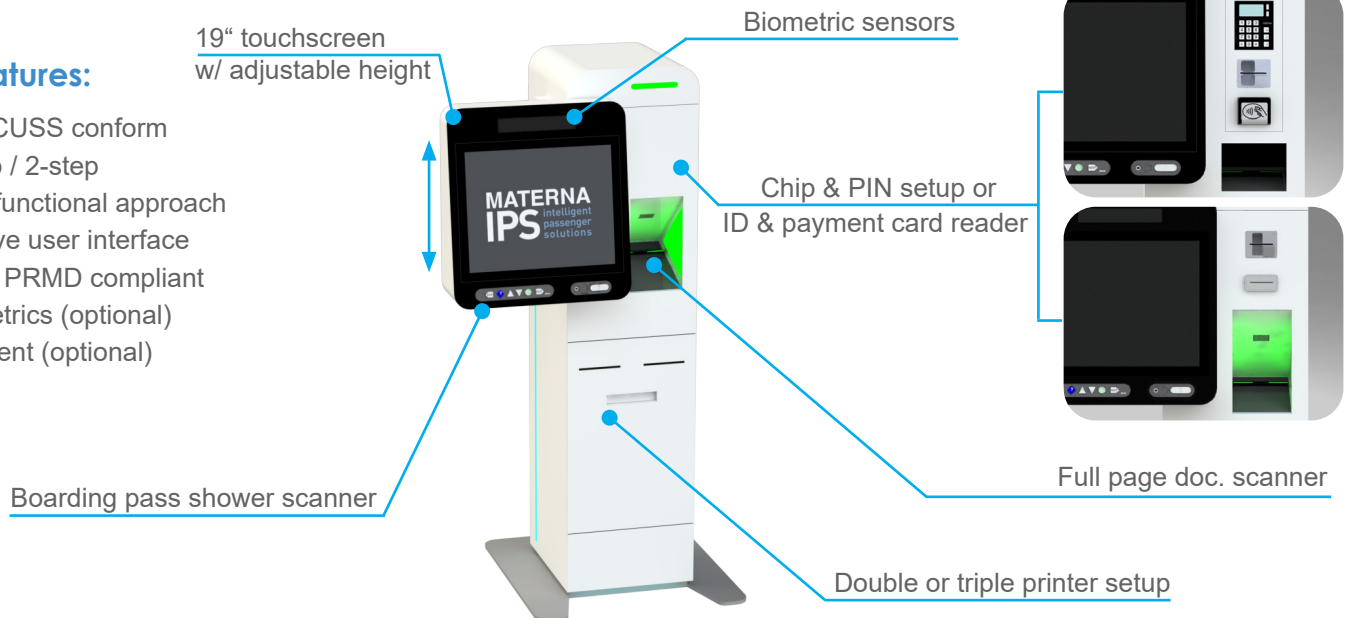

Based on the Flex.Go SBD series, the Flex.Kiosk offers maximum versatility. Depending on the customer's preferred setup, it guarantees seamless passenger handling, whether as a check-in kiosk (19" touchscreen) or a tagging machine (13.3" touchscreen).

Just like the Flex.Go SBD the kiosk's design, appearance and built-in technology stands for space-saving and intuitive passenger handling. It features a fully customizable exterior (material, colors etc) as well as interior (input devices, printers etc). Due to the multiple printer setup, Flex.Kiosk handles

both 1-step and 2-step processing and also offers technologies such as biometrics, RFID and Chip and PIN payment. With its multi-functional approach the kiosk adapts to any customer requirement and can be set up on different locations.

Main features:

- IATA CUSS conform
- 1-step / 2-step
- Multi-functional approach
- Intuitive user interface
- ADA / PRMD compliant
- Biometrics (optional)
- Payment (optional)

Your benefits:

- ✓ Extremely versatile due to multi-functional approach
- ✓ Adaptable to any airport environment
- ✓ Automated ID checks (e.g. face, passport, driver's license)
- ✓ Reduced / low PAX processing time

Touchless.Connect:

- Kiosk control via passenger's smartphone
- Web browser based, no extra app needed
- Suitable for Android, IOS & other OS
- Remote installation
- No HW modifications or recertification to SBD's
