

Flex.Mobile

About

Based on the Flex.Go SBD series, the Flex.Mobile offers the same versatility as a Flex.Kiosk, but is mobile. Depending on the customer's preferred setup, it guarantees seamless passenger handling, whether as a check-in kiosk (19" touchscreen) or a tagging machine (13.3" touchscreen).

Just like the Flex.Go SBD the kiosk's design, appearance and built-in technology stands for space-saving and intuitive passenger handling. It features a fully customizable exterior (material, colors etc) as well as interior (input devices, printers etc). Due to the double printer setup, Flex.Mobile handles

both 1-step and 2-step processing and also offers technologies such as biometrics and RFID. It is equipped with a rechargeable, interchangeable battery and retractable wheels so it can be moved to heavily frequented touchpoints during peak times and easily removed afterwards.

Main features:

- IATA CUSS conform
- 1-step / 2-step
- Multi-functional approach
- Interchangeable, rechargeable battery
- ADA / PRMD compliant
- Biometrics (optional)
- Payment (optional)

Your benefits:

- ✓ Extrem. versatile due to multi-functional approach
- ✓ Placeable at any location in the airport
- ✓ Up to 24hrs runtime on one battery charge depending on configuration
- ✓ Automated ID checks (e.g. face, passport, driver's license)

Touchless.Connect:

- Kiosk control via passenger's smartphone
- Web browser based, no extra app needed
- Suitable for Android, IOS & other OS
- Remote installation
- No HW modifications or recertification to SBD's
